### Product highlights

#### iPod & MP3 audio listening

Guests can listen to music from the source of their choice (iPod, other MP3 player or audio output from their PC) through plug & play connection with 3.5 mm audio jack

#### Viewing of video media

Viewing of video media from PC, camcorder, DVD player and various other devices is supported through VGA, composite audio/video, S-Video and HDMI connectors

#### Interactive entertainment

Game consoles can be connected to the TV through composite audio/video or HDMI connectors.

#### USB charging

USB 5 V power socket allows guests to charge their personal devices.

#### Auto detect audio/video input

Audio and video inputs are auto detecting, so the TV will automatically switch to the right input when a device is plugged in.

#### Push button control

Guests can switch between different inputs at the touch of a single button.

#### Indicator lights

Indicator lights provide easy to understand feedback to guests by showing which input is active.

#### System configurations

Connectivity Panel supports various interactive and entertainment hotel TV system configurations through industry standard Philips SmartPort protocol.

#### Stand alone configurations

Seamless integration with Philips TVs in stand alone configuration is supported; see compatibility list.

#### VGA-to-HDMI converter

With the built-in VGA-to-HDMI converter, this Connectivity Panel is compatible with a wider range of Philips Hospitality TVs, since a separate VGA input on the TV is not required.

#### Multiple mounting options

Philips Convenience Panel can be mounted in various ways, e.g. in the wall, on the desk or as a furniture build-in. An optional desktop kit is required to mount the panel on a desk.

#### Built for commercial use

Philips Connectivity Panel is a commercial product, built with high-quality materials for intensive daily use by hotel guests.
